Electric Heating Systems for Pipelines and Tanks

Electrical Power Distribution Equipment

Industrial Instruments and Controls

MasterCard and Visa Accepted

CONOFLOW PRESSURE REGULATORS.....Pressure
Regulators

*Pneumatic and Hydraulic Pressure Reducing Regulators, Differential Pressure Regulators

*Transducers-I/P, Voltage/P

*Pneumatic Actuators-Linear actuation with stroke lengths to 10"

*High Pressure Industrial and Hi Pressure High Purity Pneumatic Pressure Regulators

CONOFLOW DIAPHRAGM SEALS.....Diaphragm Seals

*Diaphragm Seals for Gauges and Instruments

*Complete Fill Service Available

DEKORON.....Self-Regulating Electric Heat Tracing
Cable

*Industrial Grade Electric Self-Regulating Heating Cables with Heater Output of 3,5 ,8,10 and
15 Watts/ Foot

*Commercial Grade Electric Self-Regulating Heating Cables with Heater Output of 5
Watts/Foot

DEKORON/UNITHERM...Preinsulated Jacketed and Heated Tubing and Hoses

*Factory Thermally Insulated and Jacketed Tubing that can include Steam or Electric Heat
Tracing in a Finished Tube Bundle Ready to Install. Standard tube sizes ¼" to ¾", Standard
Tubes for these tube bundles are made of Copper, Stainless Steel or Teflon. Optional tube
sizes and materials are available, please call to discuss options.

BRISKHEAT.....Constant Power Density Electric Heat Tracing
Cable

*CPD Electric Heat Trace with Heater Outputs of 5, 8, 10, 12 or 18 Watts/Foot

*Silicone Rubber Electric Heating Pads Blankets and Tapes for Tanks and Vessels

*Drum Heaters for Electrically Heating 5 Gallon Pails to 55 Gallon Drums

TRASOR CORPORATION.....MI (Mineral Insulated) Electric Heat Trace
Cable

*MI Heating Cables are used for heating Pipelines, Tanks and Snow Melt Heating

MI heating cables can withstand to 1000°F ambient conditions and will give very long service.

THERMO SYSTEMS TECH.....Impedance and Skin Effect Pipeline Heating

*Impedance Heating Systems make the pipe itself the heater allowing for even-overall heat

eliminating hotspots, temperatures can be maintained up to the design limits of the pipe used.
*Skin Effect Heating Systems are used for very long heat tracing runs and can heat up to 16 miles of pipe on a single circuit.

OGONTZ.....Temperature Controlling Valves and Steam Traps

- *Steam Traced Piping Temperature Control Valves.
- *Water Line Temperature Control Valves
- *Automatic Tank Temperature Control Valves
- *Automatic Pipeline and Tank Freeze Protection Control Valves
- *Steam Traps, both Thermodynamic and Sub-Cooled Condensate

THERMOCOUPLE TECHNOLOGY.....Thermocouples, RTD's and Thermowells

- *Thermocouples J,K,E,T. RTD's 100ohm Platinum
- *Thermocouples and RTD's for High Temperature and High Vibration Applications
- *Thermowells and Protection Tubes, We offer a wide variety of materials and process connections to choose from

VTI.....Electric Power Distribution Substations

- *Electric Power Distribution Substations for Lighting and Appliance Loads
Transformer and Distribution Panel(s) in a single cabinet. Transformers to 150KVA. Small footprint of our space saving design is ideal for tight electrical rooms. Cabinets can include other devices including TVSS's and lighting controls. Cabinets made to NEMA 1, 3R, 4X and 12 and are UL Labeled

REOTEMP.....Pressure Gauges, Thermometers, Pressure Transmitters

- *Pressure Gauges, Thermometers, Pressure Snubbers, Siphons and Needle Valves.

3D Instruments.....Pressure Gauges

- ***Direct Drive Pressure Gauges with Dial Sizes to 12" for Easy Viewing**

- *Digital Pressure Gauges with Large Easy-To-Read Display
- *Hand Pumps for generating Hydraulic or Pneumatic Pressure

AALBORG.....Variable Area Flowmeters
